

ENVIRONMENTAL POLICY

This Environmental Policy shall apply in our administration department and in all production plants of ALPHA TECHNOLOGY Sp. z o.o. except for Plastic Processing Plant in Dobczyce, where the ISO 14001 system has been implemented and which includes a separate "Environmental Policy" document.

ALPHA TECHNOLOGY Sp. z o.o. provides production services to domestic and foreign customers, mainly for automotive, construction, electrotechnical, and textile industries.

We conduct our business using the principle of sustainable development policy, which takes into account deliberated and well-formed relationships between economic growth, care for the natural environment and human health.

Being aware of the impact of our activities on the natural environment, we act in an environmentally friendly manner, implementing processes aimed at improving the methods of preventing negative effects on the environment.

We also make efforts to restrict the potential negative impact of any aspect of our business on the environment.

Being aware of our responsibility, we commit ourselves to:

- systematic improvement of the environmental awareness of employees;
- compliance with legal requirements and other environmental regulations applicable to our business activities;
- preventing environmental pollution and reduction of the amount of production waste;
- implementation of appropriate, selective waste management;
- optimization of the consumption of raw materials for production and consumables;
- elimination of the risk of environmental failures by regular monitoring of installations, machines and devices;
- rational use of all energy sources;
- creating pro-ecological activity among suppliers.

We implement the Environmental Policy in particular through:

- use of raw materials and technologies in production processes, that are safe for people and the environment;
- activities aimed at the protection of natural resources by reducing the consumption of electricity, heat, fuels and water;
- improvement of our technological processes, investments and modernization of devices aimed at reducing the harmful impact on the environment;
- improvement of solid and liquid waste management in order to minimize the negative impact on the natural environment;
- rational use of natural resources;
- systematic supervision legal requirements relating to the environment and other regulations concerning our company.

All our employees are obliged to know and respect the Environmental Policy communicated to them.

NATURE CAN LIVE WITHOUT MAN, BUT MAN WITHOUT NATURE WILL DIE.
